

Preliminary Results

- Gaining and losing streams have been identified.
- Preferential flow patterns have been identified in Lake Belton during ADCP spring study.
- No perchlorate has been detected in the delta areas of Lakes Belton and Waco
- Perchlorate concentrations dilute significantly as they travel downstream from NWIRP.
- All samples collected from the Leon River, Middle Bosque and Cowhouse creek are below detection levels.
- All intake sampling performed by the study team have been below detection limits.
